Ravens / Eagles multiple | 2025 baseline: TEN

A diagram showing a graph with nodes and edges. The vertical axis has labels 0, 10, and 20. There are two horizontal grey lines at y=10 and y=20. Nodes are represented by circles: blue circles labeled 4, 6, 7, 8, 9, 10; red circles labeled 0, 1, 2, 3, 5. Edges are shown as arrows: blue arrows from 4 to 9, 6 to 10, 7 to 20, 8 to 20; red arrows from 0 to 1, 1 to 2, 2 to 3, 3 to 5, and from 5 to both 4 and 6. Two pairs of overlapping ellipses are centered around y=10 and y=20.

[illegible]

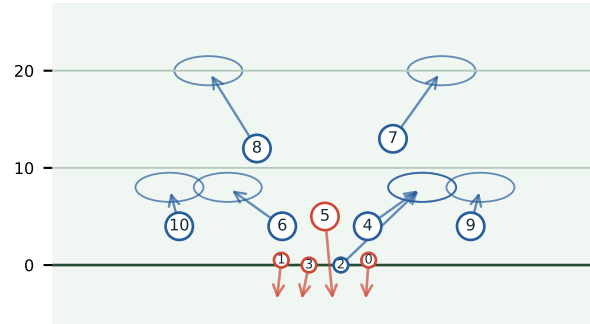

The diagram shows a set of nodes arranged in two rows. The top row contains five blue-outlined circles labeled 10, 6, 8, 5, and 7 from left to right. The bottom row contains four red-outlined circles labeled 1, 3, 2, and 0 from left to right. Above node 9 (purple) is a dashed circle. Solid arrows point from node 10 to a solid oval above it; from node 6 to a solid oval above it; from node 8 to the oval above node 6; from node 5 to a solid oval above it; from node 4 to a solid oval above it; and from node 7 to a solid oval above it. A pink arrow points from node 4 to node 9, which is also labeled 'MX'. A dashed arrow points from node 9 to a dashed oval above it.

DESIGN: red = rush lane; blue = zone landmark; M = man; MX / dashed continuation = native exchange. Numbers are defender slots.
DESIGN: assignment schematics only. Native personnel retained. Spy shows fallback landmark; runtime pursuit and complete match need a live lab.
PROVED OFFLINE: compiled front plus coverage covers all 11 slots. DESIGN: pre-snap shell, live rotation and pressure need main lab.
